**TEXAS OIL POLLUTERS ARE
USING PROP 23
TO ROLL BACK
CALIFORNIA'S CLEAN AIR
STANDARDS**

ON TUES., NOV. 2, YOU CAN STOP THEM

Don't Let Texas Oil Polluters Weaken California's Clean Air Standards That Protect Our Health and Environment

VOTE NO^{ON} 23

California already has skyrocketing rates of asthma and lung disease. Go back to a soiled and scarred environment so Texas oil polluters can boost profits? No thanks. California's tough clean air standards have us on the right track to a cleaner environment and healthier families. That's why the American Lung Association in California says vote No on 23. Also, vote No on 26 and make sure Big Tobacco and Big Oil are held accountable for the damage they cause. **You have the power to protect our health and environment. Go to polls on Nov. 2, and Vote No on 23 and 26.**

DROP PROPS 23 & 26

PROP 23 was written by Texas Big Oil to kill California's tough clean air standards.

PROP 23 increases air pollution and threatens the environment and our health.

PROP 23 increases asthma attacks and lung illnesses. That's why the American Lung Association in California opposes Prop 23.

PROP 26 is a trick by Big Tobacco and Big Oil that lets them off scot-free for the health and environmental damage they do.

**On Tues., Nov. 2,
Stand Up and Vote
No on 23 & 26.**

SAYS NO ON 23
